SUMMARY

Seeking a responsible job in a business allows me to broaden my knowledge, strengthen my talents, and contribute to the organization's overall development.

Work Experience

- **Software Engineer Trainee** - **CodeRize Technologies PVT LTD , Pune**   **May 2024 - Present**
    - I created and maintained online apps with Angular and Django, focusing on user registration, authentication, and dashboard functionality.
    - RESTful APIs were designed and connected to allow for effective communication between the frontend and backend.
    - Managed database operations, including CRUD capabilities for a variety of data entities.
    - To assist frontend applications, we implemented RESTful APIs with Django.
    - I created responsive web applications with Angular.

Technical Skills

- **Languages:** Python, SQL, and JavaScript
- **Web Technologies:** HTML5, CSS3, Bootstrap, Material Design, Typescript, Node.js.
- **Tools :** Git, Unit Testing, GitHub, VS Code, PyCharm , Postman .
- **Frameworks:** Angular, WordPress, Django, Django Rest Framework.
- **Data Management:** MySQL, MongoDB, Postgresql.
- **Platforms:** Linux, Windows 11, and Ubuntu

Projects

Employee Management Dashboard. | Python **,** Angular **,** Django **,** Bootstrap **,** postgresql

- Created a comprehensive employee management dashboard for organizational use, utilizing Angular and Django.
- Designed and integrated crucial organizational capabilities such as personnel record management, announcements, employees records and more.
- I used the Django REST Framework to create and integrate RESTful APIs that allow for seamless communication between the frontend and backend.
- Frontend: Use Angular to create dynamic and responsive user interfaces.
- Backend: Django is used to handle server-side logic and database interactions.

Education
